Summary

Aspiring Data Science and intrigued towards AI. Currently studying in my Third Year of undergraduate degree in BSc. Data Science. In the begining I wanted to become Ethical hacker as I always found coding very intresting but when I got introduced to Data Science I slowly gravitated towards it. I found it quite intresting that with the help of data science we can giving meaning to the raw data and can find insights from it. And my second thing I love about it is the business decisions and the impact I get to make from my work.

Experience

Data Analyst
DoWell Research India
Aug 2022 - Feb 2023 (7 months)
Collected, cleaned and standardize data of global indicators for 16 countries using google spreadsheet. Used Looker Studio to generate visualization charts like bar graph, filled map, pie chart, funnel chart and many more for making of the reports.
Worked with the team of data analyst and conducted analysis on data and provided insights to support business decisions.
Collaborated with cross functional teams to identify data trends, patterns and exchange information and complete the requirments.
Contributed in developing and implementing data quality control measures to ensure good data and accurate data analysis.

My roles involves to work with the team to perform statistical analysis and visualizing them to provide meaningful insights, maintain data of every team related to reports and standardize all 49 countries reports.
